ANISOS SCHEMATIC

ABOUT THIS DESIGN

Striking Anisos is composed of four triangles, two larger ones forming the back and two smaller ones wrapping to the front. Written for five sizes ranging from a dainty shawllette to dramatic statement piece, Anisos is knit in Loft from a picot cast-on for the bottom edge. The ornate lace edging is worked from charts. The body of the shawl is textured with alternating veins of garter stitch radiating from the center spine and hinging at the shoulders. Choose a saturated color to maximize the impact of this showy design.

CONSTRUCTION NOTES

- This shawl is worked from the bottom up, beginning with a picot cast on. The lace charts are worked first, then the body is worked in bands of alternating stockinette and garter stitch.
- The shawl is constructed of 4 triangles: 2 small front triangles and 2 large back triangles. The small and large triangles are separated by 2 side spines; the large triangles are separated by the center back spine.
- Read RS (odd-numbered) chart rows from right to left; read WS (even-numbered) chart rows from left to right.
- To make the charts larger and easier to work with, each chart has been enlarged and split into three sections. Work Row 1 of the Right Side section, then Row 1 of the Center and Left Side sections, working across each section in the same direction. A full version of each chart has also been provided for digital readers.

FINISHING

Weave in ends. Wet-block piece to finished measurements (see *Special Techniques*).

SPECIAL TECHNIQUES

Wet Blocking

Fill a sink or basin with warm water and a small amount of delicate dish soap or rinseless wool wash. Submerge fabric in water, gently squeezing out any air bubbles so that the piece can remain under water without being held there. Soak work for 30 minutes, allowing fabric to become completely saturated.

Drain the sink and remove work. If you have used dish soap (rather than rinseless wool wash), you will want to fill the sink again once or twice to rinse the soap from your fabric. Never place knitting directly under running water.

Squeeze out excess water from your work, taking care not to twist or wring fabric. Roll your fabric between two clean bath towels “burrito” style and firmly press towel roll. This will aid in removing moisture from the knitted piece. Remove piece from towels – your fabric should now feel damp but not saturated.

Thread blocking wires along each edge of knitted piece at regular intervals.

Pin blocking wires in place on a blocking board or other appropriate surface, using instructed dimensions. If using T-pins only, use as many pins as required to block piece into desired shape. Allow fabric to air dry completely before removing.

Knitted Cast On

Make a slip knot on L needle to begin, insert R needle into slip knot and knit a new stitch. Place new stitch on L needle. *Insert R needle into the new stitch on the L needle, wrap strand of yarn around right needle as you would for a knit stitch and pull through, place this new loop onto L needle; repeat from * until required number of stitches have been cast on. After last stitch has been cast on, slip last stitch purlwise to R needle, bring working yarn to front between needles, return last stitch to L needle and pull working yarn snugly. Repositioning the working yarn in this way creates a cleaner edge at the end of your cast-on row.
